## Boc-Glycine-2-<sup>13</sup>C

Cat. No.:	HY-Y0978S2	
CAS No.:	145143-02-8	
Molecular Formula:	C <sub>6</sub> <sup>13</sup> CH <sub>13</sub> NO <sub>4</sub>	цÖ
Molecular Weight:	176.18	
Target:	Androgen Receptor; Isotope-Labeled Compounds	
Pathway:	Vitamin D Related/Nuclear Receptor; Others	02
Storage:	Please store the product under the recommended conditions in the Certificate of	
	Analysis.	

BIOLOGICAL ACTIVITY		
Description	Boc-Glycine-2- <sup>13</sup> C is a <sup>13</sup> C-labeled Linuron. Linuron is a phenylurea herbicide that is widely used to control the growth of grass and weeds in various agriculture crops and in orchards. Linuron is a photosystem II inhibitor. Linuron is also a competitive a	
In Vitro	Stable heavy isotopes of hydrogen, carbon, and other elements have been incorporated into drug molecules, largely as tracers for quantitation during the drug development process. Deuteration has gained attention because of its potential to affect the pharmacokinetic and metabolic profiles of drugs <sup>[75]</sup> . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
