

Product Data Sheet

Formamide-d₁

Cat. No.: HY-Y0842S4 CAS No.: 35692-88-7 Molecular Formula: CH₂DNO Molecular Weight: 46.05

Target: **Endogenous Metabolite** Pathway: Metabolic Enzyme/Protease

Storage: Please store the product under the recommended conditions in the Certificate of

Analysis.

BIOLOGICAL ACTIVITY

Description	Formamide- d_1 is the deuterium labeled Formamide[1]. Formamide is an amide derived from formic acid and has been used as solvent for many ionic compounds.
In Vitro	Stable heavy isotopes of hydrogen, carbon, and other elements have been incorporated into drug molecules, largely as tracers for quantitation during the drug development process. Deuteration has gained attention because of its potential to affect the pharmacokinetic and metabolic profiles of drugs ^[1] . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
