

1,2-Distearoyl-sn-glycero-3-phosphorylethanolamine-d₇₀

Cat. No.:	HY-112530S
CAS No.:	326495-43-6
Molecular Formula:	C ₄₁ H ₁₂ D ₇₀ NO ₈ P
Molecular Weight:	818.5
Target:	Endogenous Metabolite; Isotope-Labeled Compounds
Pathway:	Metabolic Enzyme/Protease; Others
Storage:	Please store the product under the recommended conditions in the Certificate of Analysis.

BIOLOGICAL ACTIVITY

Description	1,2-Distearoyl-sn-glycero-3-phosphorylethanolamine-d ₇₀ is deuterium labeled 1,2-Distearoyl-sn-glycero-3-phosphorylethanolamine. 1,2-Distearoyl-sn-glycero-3-phosphorylethanolamine (DSPE) is a phosphoethanolamine (PE) lipid that can be used in the synthesis
In Vitro	Stable heavy isotopes of hydrogen, carbon, and other elements have been incorporated into drug molecules, largely as tracers for quantitation during the drug development process. Deuteration has gained attention because of its potential to affect the pharmacokinetic and metabolic profiles of drugs ^[2] . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
