

1-Heneicosanol

Cat. No.:	HY-134645		
CAS No.:	15594-90-8		
Molecular Formula:	C ₂₁ H ₄₄ O		
Molecular Weight:	312.57		
Target:	Biochemical Assay Reagents		
Pathway:	Others		
Storage:	Powder	-20°C	3 years
		4°C	2 years
	In solvent	-80°C	6 months
		-20°C	1 month

BIOLOGICAL ACTIVITY

Description

1-Heneicosanol is a long-chain alcohol with 21 carbon atoms commonly used in the production of surfactants, lubricants and pharmaceuticals. It can be found in various natural sources such as vegetable waxes and insect pheromones. Additionally, it has been shown to be bioactive against plants and animals and has antimicrobial properties.

In Vitro

1-Heneicosanol is a biochemical reagent that can be used as a biological material or organic compound for life science related research.
MCE has not independently confirmed the accuracy of these methods. They are for reference only.

Caution: Product has not been fully validated for medical applications. For research use only.
