

4-(N-Boc-amino)-1,6-heptanedioic acid

Cat. No.:	HY-140534
CAS No.:	848242-88-6
Molecular Formula:	C ₁₂ H ₂₁ NO ₆
Molecular Weight:	275.3
Target:	PROTAC Linkers
Pathway:	PROTAC
Storage:	Please store the product under the recommended conditions in the Certificate of Analysis.

BIOLOGICAL ACTIVITY

Description	4-(N-Boc-amino)-1,6-heptanedioic acid is an alkyl/ether-based PROTAC linker that can be used in the synthesis of PROTACs [1].
IC ₅₀ & Target	Alkyl/ether
In Vitro	PROTACs contain two different ligands connected by a linker; one is a ligand for an E3 ubiquitin ligase and the other is for the target protein. PROTACs exploit the intracellular ubiquitin-proteasome system to selectively degrade target proteins ^[1] . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
