## Amino-PEG14-alcohol

| Cat. No.:          | HY-133298   |                                    | Screening Lib |
|--------------------|---|------------------------------------|---------------|
| CAS No.:           | 34214-89-6  |                                    |               |
| Molecular Formula: | C <sub>28</sub> H <sub>59</sub> NO <sub>14</sub>  | H0~_0~_0~_0~_00                    |               |
| Molecular Weight:  | 633.77  | $\langle \circ \rangle$            | braries       |
| Target:            | PROTAC Linkers  | H <sub>2</sub> N, 0, 0, 0, 0, 0, 0 | es            |
| Pathway:           | PROTAC  |                                    | •             |
| Storage:           | Please store the product under the recommended conditions in the Certificate of Analysis. |                                    | Proteir       |

| BIOLOGICAL ACTIVITY       |  |  |
|---------------------------|--|--|
| Description               | Amino-PEG14-alcohol is a PEG-based PROTAC linker that can be used in the synthesis of PROTACs <sup>[1]</sup> .   |  |
| IC <sub>50</sub> & Target | PEGs   |  |
| In Vitro                  | PROTACs contain two different ligands connected by a linker; one is a ligand for an E3 ubiquitin ligase and the other is for the target protein. PROTACs exploit the intracellular ubiquitin-proteasome system to selectively degrade target proteins <sup>[1]</sup> . MCE has not independently confirmed the accuracy of these methods. They are for reference only. |  |
