

Aminoadipic acid-d₃

Cat. No.:	HY-113328S
CAS No.:	2483832-01-3
Molecular Formula:	C ₆ H ₈ D ₃ NO ₄
Molecular Weight:	164.17
Target:	Endogenous Metabolite
Pathway:	Metabolic Enzyme/Protease
Storage:	Please store the product under the recommended conditions in the Certificate of Analysis.

BIOLOGICAL ACTIVITY

Description	Aminoadipic acid-d ₃ is the deuterium labeled Aminoadipic acid. Aminoadipic acid is an intermediate in the metabolism of lysine and saccharopine.
In Vitro	Stable heavy isotopes of hydrogen, carbon, and other elements have been incorporated into drug molecules, largely as tracers for quantitation during the drug development process. Deuteration has gained attention because of its potential to affect the pharmacokinetic and metabolic profiles of drugs ^[1] . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
