

Arachidonic acid-d5

Cat. No.:	HY-109590S1
CAS No.:	123167-26-0
Molecular Formula:	C ₂₀ H ₂₇ D ₅ O ₂
Molecular Weight:	309.5
Target:	Endogenous Metabolite
Pathway:	Metabolic Enzyme/Protease
Storage:	Solution, -20°C, 2 years

BIOLOGICAL ACTIVITY

Description	Arachidonic acid-d ₅ is the deuterium labeled Arachidonic acid. Arachidonic acid is an essential fatty acid and a major constituent of biomembranes.
In Vitro	Stable heavy isotopes of hydrogen, carbon, and other elements have been incorporated into drug molecules, largely as tracers for quantitation during the drug development process. Deuteration has gained attention because of its potential to affect the pharmacokinetic and metabolic profiles of drugs ^[1] . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
