

Asymmetric dimethylarginine-d7 hydrochloride

Cat. No.:	HY-113216AS
Molecular Formula:	C ₈ H ₁₂ D ₇ ClN ₄ O ₂
Molecular Weight:	245.76
Target:	Endogenous Metabolite
Pathway:	Metabolic Enzyme/Protease
Storage:	Please store the product under the recommended conditions in the Certificate of Analysis.

HCl

BIOLOGICAL ACTIVITY

Description	Asymmetric dimethylarginine-d ₇ (hydrochloride) is the deuterium labeled Asymmetric dimethylarginine hydrochloride[1].
In Vitro	Stable heavy isotopes of hydrogen, carbon, and other elements have been incorporated into drug molecules, largely as tracers for quantitation during the drug development process. Deuteration has gained attention because of its potential to affect the pharmacokinetic and metabolic profiles of drugs ^[1] . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
