

Product Data Sheet

Azido-PEG23-amine

Cat. No.: HY-140219

CAS No.: 2172677-19-7 Molecular Formula: $C_{48}H_{98}N_4O_{23}$

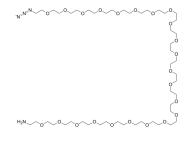

Molecular Weight: 1099.3

Target: PROTAC Linkers

Pathway: PROTAC

Storage: Please store the product under the recommended conditions in the Certificate of

Analysis.

BIOLOGICAL ACTIVITY

| Description | Azido-PEG23-amine is a PEG-based PROTAC linker that can be used in the synthesis of PROTACs ^[1] . Azido-PEG23-amine is a click chemistry reagent, it contains an Azide group and can undergo copper-catalyzed azide-alkyne cycloaddition reaction (CuAAc) with molecules containing Alkyne groups. Strain-promoted alkyne-azide cycloaddition (SPAAC) can also occur with molecules containing DBCO or BCN groups. |
|---------------------------|---|
| IC ₅₀ & Target | PEGs |
| In Vitro | PROTACs contain two different ligands connected by a linker; one is a ligand for an E3 ubiquitin ligase and the other is for the target protein. PROTACs exploit the intracellular ubiquitin-proteasome system to selectively degrade target proteins ^[1] . MCE has not independently confirmed the accuracy of these methods. They are for reference only. |
