## Product Data Sheet

## Azido-PEG4-formylhydrazine-Boc

Cat. No.:	HY-138388	
Molecular Formula:	C <sub>14</sub> H <sub>27</sub> N <sub>5</sub> O <sub>7</sub>	
Molecular Weight:	377.39	<sup>N;</sup> N <sup>*</sup> , N <sup>*</sup> ,
Target:	PROTAC Linkers	
Pathway:	PROTAC	
Storage:	Please store the product under the recommended conditions in the Certificate of Analysis.	

BIOLOGICAL ACTIVITY		
BIOLOGICALACTI		
Description	Azido-PEG4-formylhydrazine-Boc is a PEG-based PROTAC linker that can be used in the synthesis of PROTACs <sup>[1]</sup> . Azido- PEG4-formylhydrazine-Boc is a click chemistry reagent, it contains an Azide group and can undergo copper-catalyzed azide- alkyne cycloaddition reaction (CuAAc) with molecules containing Alkyne groups. Strain-promoted alkyne-azide cycloaddition (SPAAC) can also occur with molecules containing DBCO or BCN groups.	
IC <sub>50</sub> & Target	PEGs	
In Vitro	PROTACs contain two different ligands connected by a linker; one is a ligand for an E3 ubiquitin ligase and the other is for the target protein. PROTACs exploit the intracellular ubiquitin-proteasome system to selectively degrade target proteins <sup>[1]</sup> . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
