### BIOLOGICAL ACTIVITY

<b>Description</b>	EN219-O-C4-NH2 TFA incorporates an E3 ubiquitin ligase ligand, and a PROTAC linker. EN219-O-C4-NH2 TFA can be used to design PROTACs.
<b>In Vitro</b>	PROTACs contain two different ligands connected by a linker; one is a ligand for an E3 ubiquitin ligase and the other is for the target protein. PROTACs exploit the intracellular ubiquitin-proteasome system to selectively degrade target proteins. MCE has not independently confirmed the accuracy of these methods. They are for reference only.
