BIOLOGICAL ACTIVITY

Description	FAK-IN-6 is a potent FAK inhibitor with an IC_{50} value of 1.415 nM. FAK-IN-6 has anti-proliferative activity against certain cancer cell lines. FAK-IN-6 can be used for researching pancreatic cancer[1].
IC_{50} & Target	IC_{50}: 1.415 nM (FAK)[1]
In Vitro	FAK-IN-6 (compound 9h) (0-10 μM; 72 h) has anti-proliferative activity against pancreatic cancer cells, lung cancer cells and lymphoma cells[1]. MCE has not independently confirmed the accuracy of these methods. They are for reference only.
