

## Fosfructose-<sup>13</sup>C<sub>6</sub> tetrasodium hydrate

<b>Cat. No.:</b>	HY-106950S1
<b>Molecular Formula:</b>	<sup>13</sup> C <sub>6</sub> H <sub>10</sub> Na <sub>4</sub> O <sub>12</sub> P <sub>2</sub>
<b>Molecular Weight:</b>	434
<b>Target:</b>	Endogenous Metabolite
<b>Pathway:</b>	Metabolic Enzyme/Protease
<b>Storage:</b>	Please store the product under the recommended conditions in the Certificate of Analysis.

### BIOLOGICAL ACTIVITY

<b>Description</b>	Fosfructose- <sup>13</sup> C <sub>6</sub> (tetrasodium hydrate) is the <sup>13</sup> C labeled <a href="#">Fosfructose</a> (HY-106950). <a href="#">Fosfructose</a> is a cytoprotective natural sugar phosphate for the potential treatment of cardiovascular ischemia, sickle cell anemia and asthma[1].
<b>In Vitro</b>	Stable heavy isotopes of hydrogen, carbon, and other elements have been incorporated into drug molecules, largely as tracers for quantitation during the drug development process. Deuteration has gained attention because of its potential to affect the pharmacokinetic and metabolic profiles of drugs <sup>[1]</sup> . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
