

Iboxamycin

Cat. No.:	HY-139798
CAS No.:	2640000-92-4
Molecular Formula:	C ₂₂ H ₃₉ ClN ₂ O ₆ S
Molecular Weight:	495.07
Target:	Bacterial
Pathway:	Anti-infection
Storage:	Please store the product under the recommended conditions in the Certificate of Analysis.

BIOLOGICAL ACTIVITY

Description	Iboxamycin is a potent antibiotic candidate bearing a fused bicyclic amino acid residue. Iboxamycin is orally bioavailable, safe and effective in researching both Gram-positive and Gram-negative bacterial infections in mice ^{[1][2]} .
In Vitro	Iboxamycin is effective against ESKAPE pathogens including strains expressing Erm and Cfr ribosomal RNA methyltransferase enzymes, products of genes that confer resistance to all clinically relevant antibiotics targeting the large ribosomal subunit, namely macrolides, lincosamides, phenicols, oxazolidinones, pleuromutilins and streptogramins ^[2] . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
