

Licarbazepine-d₄

Cat. No.:	HY-108506S1
CAS No.:	1020719-39-4
Molecular Formula:	C ₁₅ H ₁₀ D ₄ N ₂ O ₂
Molecular Weight:	258.31
Target:	Sodium Channel; Isotope-Labeled Compounds
Pathway:	Membrane Transporter/Ion Channel; Others
Storage:	Please store the product under the recommended conditions in the Certificate of Analysis.

BIOLOGICAL ACTIVITY

Description	Licarbazepine-d ₄ is the deuterium labeled Licarbazepine (HY-108506). Licarbazepine is a voltage-gated sodium channel blocker with anticonvulsant and mood-stabilizing effects[1][2].
In Vitro	Stable heavy isotopes of hydrogen, carbon, and other elements have been incorporated into drug molecules, largely as tracers for quantitation during the drug development process. Deuteration has gained attention because of its potential to affect the pharmacokinetic and metabolic profiles of drugs ^[1] . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
