

Methyl heptanoate

Cat. No.:	HY-141610		
CAS No.:	106-73-0		
Molecular Formula:	C ₈ H ₁₆ O ₂		
Molecular Weight:	144.21		
Target:	Biochemical Assay Reagents		
Pathway:	Others		
Storage:	Pure form	-20°C	3 years
		4°C	2 years
	In solvent	-80°C	6 months
		-20°C	1 month

BIOLOGICAL ACTIVITY

Description	Methyl heptanoate, commonly used as a flavoring and fragrance ingredient in the food and cosmetic industries, Methyl heptanoate is also used as a solvent for various substances, including resins, oils and waxes, in addition, it has been studied for its potential as a biofuel and polymer production application.
In Vitro	Methyl heptanoate is a biochemical reagent that can be used as a biological material or organic compound for life science related research. MCE has not independently confirmed the accuracy of these methods. They are for reference only.

Caution: Product has not been fully validated for medical applications. For research use only.
