

N-Demethyl Promethazine-d3 hydrochloride

| | |
|---------------------------|-------------------------------------------------------------------------------------------|
| Cat. No.: | HY-141742S |
| CAS No.: | 1330173-19-7 |
| Molecular Formula: | C ₁₆ H ₁₆ D ₃ ClN ₂ S |
| Molecular Weight: | 309.87 |
| Target: | Isotope-Labeled Compounds |
| Pathway: | Others |
| Storage: | Please store the product under the recommended conditions in the Certificate of Analysis. |

BIOLOGICAL ACTIVITY

| | |
|--------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Description | N-Demethyl Promethazine-d3 hydrochloride is the deuterium labeled N-Demethyl Promethazine hydrochloride ^[1] . |
| In Vitro | Stable heavy isotopes of hydrogen, carbon, and other elements have been incorporated into drug molecules, largely as tracers for quantitation during the drug development process. Deuteration has gained attention because of its potential to affect the pharmacokinetic and metabolic profiles of drugs ^[1] . MCE has not independently confirmed the accuracy of these methods. They are for reference only. |
