

N,N'-bis-(azide-PEG3)-Cy5

Cat. No.:	HY-141060
CAS No.:	2107273-46-9
Molecular Formula:	C ₄₁ H ₅₇ ClN ₈ O ₆
Molecular Weight:	793.39
Target:	PROTAC Linkers
Pathway:	PROTAC
Storage:	Please store the product under the recommended conditions in the Certificate of Analysis.

BIOLOGICAL ACTIVITY

Description	NN'-bis-(azide-PEG3)-Cy5 is a PEG-based PROTAC linker that can be used in the synthesis of PROTACs ^[1] . N,N'-bis-(azide-PEG3)-Cy5 is a click chemistry reagent, it contains an Azide group and can undergo copper-catalyzed azide-alkyne cycloaddition (CuAAC) with molecules containing Alkyne groups. Strain-promoted alkyne-azide cycloaddition (SPAAC) can also occur with molecules containing DBCO or BCN groups.
IC₅₀ & Target	PEGs
In Vitro	PROTACs contain two different ligands connected by a linker; one is a ligand for an E3 ubiquitin ligase and the other is for the target protein. PROTACs exploit the intracellular ubiquitin-proteasome system to selectively degrade target proteins ^[1] . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
