## Propargyl-PEG10-acid

			2
Cat. No.:	HY-140020		
CAS No.:	2055022-18-7	~	21111
Molecular I	Formula: C <sub>24</sub> H <sub>44</sub> O <sub>12</sub>	~°~~°~~°	r Z
Molecular	Neight: 524.6		2
Target:	PROTAC Linkers	$H_{0} \sim 0 \sim 0 \sim 0$	5
Pathway:	PROTAC		•
Storage:	Please store the product under the recommended conditions in the Certificat Analysis.	e of	

BIOLOGICAL ACTIVITY			
Description	Propargyl-PEG10-acid is a PEG-based PROTAC linker that can be used in the synthesis of PROTACs <sup>[1]</sup> . Propargyl-PEG10-acid is a click chemistry reagent, it contains an Alkyne group and can undergo copper-catalyzed azide-alkyne cycloaddition (CuAAc) with molecules containing Azide groups.		
IC <sub>50</sub> & Target	PEGs		
In Vitro	PROTACs contain two different ligands connected by a linker; one is a ligand for an E3 ubiquitin ligase and the other is for the target protein. PROTACs exploit the intracellular ubiquitin-proteasome system to selectively degrade target proteins <sup>[1]</sup> . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
