

Propargyl-PEG12-acid

Cat. No.:	HY-138764
Molecular Formula:	C ₂₈ H ₅₂ O ₁₄
Molecular Weight:	612.7
Target:	PROTAC Linkers
Pathway:	PROTAC
Storage:	Please store the product under the recommended conditions in the Certificate of Analysis.

BIOLOGICAL ACTIVITY

Description	Propargyl-PEG12-acid is a PEG-based PROTAC linker that can be used in the synthesis of PROTACs ^[1] . Propargyl-PEG12-acid is a click chemistry reagent, it contains an Alkyne group and can undergo copper-catalyzed azide-alkyne cycloaddition (CuAAC) with molecules containing Azide groups.
IC ₅₀ & Target	PEGs
In Vitro	PROTACs contain two different ligands connected by a linker; one is a ligand for an E3 ubiquitin ligase and the other is for the target protein. PROTACs exploit the intracellular ubiquitin-proteasome system to selectively degrade target proteins ^[1] . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
