

Product Data Sheet

Propargyl-PEG14-Boc

Cat. No.: HY-140030

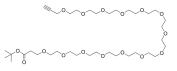

Molecular Formula: $C_{36}H_{68}O_{16}$ Molecular Weight: 756.92

Target: PROTAC Linkers

Pathway: PROTAC

Storage: Please store the product under the recommended conditions in the Certificate of

Analysis.

BIOLOGICAL ACTIVITY

| Description | Propargyl-PEG14-Boc is a PEG-based PROTAC linker that can be used in the synthesis of PROTACs ^[1] . Propargyl-PEG14-Boc is a click chemistry reagent, it contains an Alkyne group and can undergo copper-catalyzed azide-alkyne cycloaddition (CuAAc) with molecules containing Azide groups. | |
|---------------------------|--|-------------|
| IC ₅₀ & Target | PEGs | Alkyl/ether |
| In Vitro | PROTACs contain two different ligands connected by a linker; one is a ligand for an E3 ubiquitin ligase and the other is for the target protein. PROTACs exploit the intracellular ubiquitin-proteasome system to selectively degrade target proteins ^[1] . MCE has not independently confirmed the accuracy of these methods. They are for reference only. | |
