

## Propargyl-PEG4-CH<sub>2</sub>COOH

Cat. No.:	HY-140023		
CAS No.:	1429934-37-1		
Molecular Formula:	C <sub>13</sub> H <sub>22</sub> O <sub>7</sub>		
Molecular Weight:	290.31		
Target:	PROTAC Linkers		
Pathway:	PROTAC		
Storage:	Pure form	-20°C	3 years
		4°C	2 years
	In solvent	-80°C	6 months
		-20°C	1 month

### BIOLOGICAL ACTIVITY

Description	Propargyl-PEG4-CH <sub>2</sub> COOH is a PEG-based PROTAC linker that can be used in the synthesis of PROTACs <sup>[1]</sup> . Propargyl-PEG4-CH <sub>2</sub> COOH is a click chemistry reagent, it contains an Alkyne group and can undergo copper-catalyzed azide-alkyne cycloaddition (CuAAC) with molecules containing Azide groups.
IC <sub>50</sub> & Target	PEGs
In Vitro	PROTACs contain two different ligands connected by a linker; one is a ligand for an E3 ubiquitin ligase and the other is for the target protein. PROTACs exploit the intracellular ubiquitin-proteasome system to selectively degrade target proteins <sup>[1]</sup> . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
