

Product Data Sheet

Inhibitors

Screening Libraries

Proteins

Propargyl-PEG7-acid

Cat. No.: HY-130383 CAS No.: 2093154-00-6

Molecular Formula: $C_{18}H_{32}O_{9}$ Molecular Weight: 392.44

Target: ADC Linker; PROTAC Linkers

Pathway: Antibody-drug Conjugate/ADC Related; PROTAC

Storage: 4°C, stored under nitrogen

* In solvent : -80°C, 6 months; -20°C, 1 month (stored under nitrogen)

BIOLOGICAL ACTIVITY

Description	Propargyl-PEG7-acid is a PEG-based PROTAC linker can be used in the synthesis of PROTACs. Propargyl-PEG7-acid is a cleavable ADC linker used in the synthesis of antibody-drug conjugates (ADCs) ^[1] . Propargyl-PEG7-acid is a click chemistry reagent, it contains an Alkyne group and can undergo copper-catalyzed azide-alkyne cycloaddition (CuAAc) with molecules containing Azide groups.
IC ₅₀ & Target	Cleavable Linker PEGs
In Vitro	PROTACs contain two different ligands connected by a linker; one is a ligand for an E3 ubiquitin ligase and the other is for the target protein. PROTACs exploit the intracellular ubiquitin-proteasome system to selectively degrade target proteins. ADCs are comprised of an antibody to which is attached an ADC cytotoxin through an ADC linker. MCE has not independently confirmed the accuracy of these methods. They are for reference only.
