### BIOLOGICAL ACTIVITY

|---------------------------|--|
| Description               | (S)-TCO-PEG3-amine is a PEG-based PROTAC linker that can be used in the synthesis of PROTACs <sup>[1]</sup> .  |
| IC <sub>50</sub> & Target | PEGs   |
| In Vitro                  | PROTACs contain two different ligands connected by a linker; one is a ligand for an E3 ubiquitin ligase and the other is for the target protein. PROTACs exploit the intracellular ubiquitin-proteasome system to selectively degrade target proteins <sup>[1]</sup> . MCE has not independently confirmed the accuracy of these methods. They are for reference only. |
