

## Tauroolithocholic acid-d4 sodium

Cat. No.:	HY-113308AS
CAS No.:	2410279-97-7
Molecular Formula:	C <sub>26</sub> H <sub>40</sub> D <sub>4</sub> NNaO <sub>5</sub> S
Molecular Weight:	509.71
Target:	Calcium Channel; Endogenous Metabolite
Pathway:	Membrane Transporter/Ion Channel; Neuronal Signaling; Metabolic Enzyme/Protease
Storage:	Please store the product under the recommended conditions in the Certificate of Analysis.

### BIOLOGICAL ACTIVITY

<b>Description</b>	Tauroolithocholic acid-d4 sodium is the deuterium labeled Tauroolithocholic acid (sodium salt). Tauroolithocholic acid sodium salt, a potent cholestatic agent, is a potent Ca <sup>2+</sup> agonist <sup>[1]</sup> .
<b>In Vitro</b>	Stable heavy isotopes of hydrogen, carbon, and other elements have been incorporated into drug molecules, largely as tracers for quantitation during the drug development process. Deuteration has gained attention because of its potential to affect the pharmacokinetic and metabolic profiles of drugs <sup>[1]</sup> . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
