

Calcifediol-d₆ monohydrate

Cat. No.:	HY-32351AS
CAS No.:	2483831-70-3
Molecular Formula:	C ₂₇ H ₄₀ D ₆ O ₃
Molecular Weight:	424.69
Target:	Endogenous Metabolite; Isotope-Labeled Compounds; VD/VDR
Pathway:	Metabolic Enzyme/Protease; Others; Vitamin D Related/Nuclear Receptor
Storage:	Please store the product under the recommended conditions in the Certificate of Analysis.

BIOLOGICAL ACTIVITY

Description	Calcifediol-d ₆ (monohydrate) is the deuterium labeled Calcifediol monohydrate. Calcifediol monohydrate (25-hydroxy Vitamin D3 monohydrate), a major circulating metabolite of vitamin D3, is a potent VDR ligand ^{[1][2]} .
In Vitro	Stable heavy isotopes of hydrogen, carbon, and other elements have been incorporated into drug molecules, largely as tracers for quantitation during the drug development process. Deuteration has gained attention because of its potential to affect the pharmacokinetic and metabolic profiles of drugs ^[1] . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
