

ATP-18O4 disodium salt

Cat. No.:	HY-B0345AS
CAS No.:	2483830-61-9
Molecular Formula:	C ₁₀ H ₁₆ N ₅ NaO ₉ ¹⁸ O ₄ P ₃
Molecular Weight:	538.17
Target:	Endogenous Metabolite
Pathway:	Metabolic Enzyme/Protease
Storage:	Please store the product under the recommended conditions in the Certificate of Analysis.

BIOLOGICAL ACTIVITY

Description	ATP- ¹⁸ O ₄ (disodium salt) is the ¹⁸ O labeled ATP disodium salt[1]. ATP disodium salt (Adenosine 5'-triphosphate disodium salt) is a central component of energy storage and metabolism in vivo, provides the metabolic energy to drive metabolic pumps and serves as a coenzyme in cells. ATP disodium salt is an important endogenous signaling molecule in immunity and inflammation[2][3].
In Vitro	Stable heavy isotopes of hydrogen, carbon, and other elements have been incorporated into drug molecules, largely as tracers for quantitation during the drug development process. Deuteration has gained attention because of its potential to affect the pharmacokinetic and metabolic profiles of drugs ^[1] . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
