

Alosetron

Cat. No.:	HY-70050A
CAS No.:	122852-42-0
Molecular Formula:	C ₁₇ H ₁₈ N ₄ O
Molecular Weight:	294.35
Target:	5-HT Receptor
Pathway:	GPCR/G Protein; Neuronal Signaling
Storage:	Please store the product under the recommended conditions in the Certificate of Analysis.

BIOLOGICAL ACTIVITY

Description	Alosetron (GR 68755) is a potent and highly selective serotonin 5-HT ₃ receptor antagonist. Alosetron is used for the research of irritable bowel syndrome (IBS). Alosetron blocks the fast 5HT ₃ -mediated depolarisation of guinea-pig myenteric and submucosal neurons, with IC ₅₀ at ~55 nM. Alosetron attenuates the visceral nociceptive effect of rectal distension in conscious or anaesthetised dogs. Anti-inflammatory effects ^{[1][2]} .
IC ₅₀ & Target	5-HT ₃ Receptor
In Vivo	Dexamethasone and Alosetron-treated (1 mg/kg; ip; daily for 6 days) rats exhibits a significant decrease in the diarrhea index, in comparison with TNBS-control group, especially after the initial 2 days of treatment following the induction of colitis ^[2] . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
