

Butylparaben-¹³C₆

Cat. No.:	HY-B1431S1
CAS No.:	1416711-53-9
Molecular Formula:	C ₅ ¹³ C ₆ H ₁₄ O ₃
Molecular Weight:	200.18
Target:	Bacterial; Endogenous Metabolite
Pathway:	Anti-infection; Metabolic Enzyme/Protease
Storage:	Please store the product under the recommended conditions in the Certificate of Analysis.

BIOLOGICAL ACTIVITY

Description	Butylparaben- ¹³ C ₆ is the ¹³ C labeled Butylparaben[1]. Butylparaben is an organic compound, has proven to be a highly successful antimicrobial preservative in cosmetics, also used in medication suspensions, and as a flavoring additive in food.
In Vitro	Stable heavy isotopes of hydrogen, carbon, and other elements have been incorporated into drug molecules, largely as tracers for quantitation during the drug development process. Deuteration has gained attention because of its potential to affect the pharmacokinetic and metabolic profiles of drugs ^[1] . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
