

Prednisolone acetate-d₈

| | |
|---------------------------|---|
| Cat. No.: | HY-B1214S |
| Molecular Formula: | C ₂₃ H ₂₂ D ₈ O ₆ |
| Molecular Weight: | 410.53 |
| Target: | Glucocorticoid Receptor; Isotope-Labeled Compounds |
| Pathway: | Immunology/Inflammation; Vitamin D Related/Nuclear Receptor; Others |
| Storage: | Please store the product under the recommended conditions in the Certificate of Analysis. |

BIOLOGICAL ACTIVITY

| | |
|--------------------|--|
| Description | Prednisolone acetate-d ₈ is the deuterium labeled Prednisolone acetate. Prednisolone acetate (Prednisolone 21-acetate) is an adrenal cortico hormones, with anti-inflammatory, anti-allergic and immune suppressive effects. |
| In Vitro | Stable heavy isotopes of hydrogen, carbon, and other elements have been incorporated into drug molecules, largely as tracers for quantitation during the drug development process. Deuteration has gained attention because of its potential to affect the pharmacokinetic and metabolic profiles of drugs ^[1] . MCE has not independently confirmed the accuracy of these methods. They are for reference only. |
