

Propafenone-(phenyl-dd₅) (hydrochloride)

Cat. No.:	HY-B0432AS4
CAS No.:	93909-48-9
Molecular Formula:	C ₂₁ H ₂₃ D ₅ ClNO ₃
Molecular Weight:	382.94
Target:	Sodium Channel
Pathway:	Membrane Transporter/Ion Channel
Storage:	Please store the product under the recommended conditions in the Certificate of Analysis.

BIOLOGICAL ACTIVITY

Description	Propafenone-(phenyl-dd ₅) (hydrochloride) is the deuterium labeled Propafenone hydrochloride[1]. Propafenone hydrochloride is a class of anti-arrhythmic medication, which treats illnesses associated with rapid heart beats such as atrial and ventricular arrhythmias[2].
In Vitro	Stable heavy isotopes of hydrogen, carbon, and other elements have been incorporated into drug molecules, largely as tracers for quantitation during the drug development process. Deuteration has gained attention because of its potential to affect the pharmacokinetic and metabolic profiles of drugs ^[1] . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
