

Ronidazole-d₃

Cat. No.:	HY-B0565S
CAS No.:	1015855-87-4
Molecular Formula:	C ₆ H ₃ D ₃ N ₄ O ₄
Molecular Weight:	203.17
Target:	Isotope-Labeled Compounds
Pathway:	Others
Storage:	Please store the product under the recommended conditions in the Certificate of Analysis.

BIOLOGICAL ACTIVITY

Description	Ronidazole-d ₃ is the deuterium labeled Ronidazole (HY-B0565) ^[1] . Ronidazole is a potent and orally active antiprotozoal and anti-microbial agent. Ronidazole acts as a veterinary agent against <i>Trichomonas foetus</i> in cats models. Ronidazole can be used in the research of foal histomoniasis and swine dysentery ^[2] .
In Vitro	Stable heavy isotopes of hydrogen, carbon, and other elements have been incorporated into drug molecules, largely as tracers for quantitation during the drug development process. Deuteration has gained attention because of its potential to affect the pharmacokinetic and metabolic profiles of drugs ^[1] . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
