

ATTO 532 iodacetamid

Cat. No.:	HY-D2052
Target:	Fluorescent Dye
Pathway:	Others
Storage:	Please store the product under the recommended conditions in the Certificate of Analysis.

ATTO 532 iodacetamid

BIOLOGICAL ACTIVITY

Description

ATTO 532 iodacetamid is a new fluorescent marker based on the Rhodamine structure. It has strong absorption, high fluorescence quantum yield, high thermal stability and photochemical stability, and is suitable for single molecule detection and high-resolution microscopy. ATTO 532 iodacetamid is an iodoacetamide derivative of ATTO 532, which can be used to label proteins or antibodies.

Caution: Product has not been fully validated for medical applications. For research use only.
