

D-galactosyl- β 1-3-N-acetyl-D-hexosamine phosphorylase (BiGalHexNAcP)

Cat. No.:	HY-E70033
Target:	Endogenous Metabolite
Pathway:	Metabolic Enzyme/Protease
Storage:	Please store the product under the recommended conditions in the Certificate of Analysis.

D-galactosyl- β 1-3-N-acetyl-D-hexosamine phosphorylase

BIOLOGICAL ACTIVITY

Description

D-galactosyl- β 1-3-N-acetyl-D-hexosamine phosphorylase (BiGalHexNAcP) is a member of CAZy glycoside hydrolase GH112 family, is often used in biochemical studies. D-galactosyl- β 1-3-N-acetyl-D-hexosamine phosphorylase (BiGalHexNAcP) catalyses the phosphorolysis of lacto-n-biose and galacto-n-biose, to produce Gal-1-P and the corresponding N-acetyl-D-hexosamine^[1].
