

L-Lysine-¹³C₆ hydrochloride

Cat. No.:	HY-N0470S8
CAS No.:	1228077-86-8
Molecular Formula:	¹³ C ₆ H ₁₅ ClN ₂ O ₂
Molecular Weight:	188.6
Target:	Endogenous Metabolite; Virus Protease
Pathway:	Metabolic Enzyme/Protease; Anti-infection
Storage:	Please store the product under the recommended conditions in the Certificate of Analysis.

BIOLOGICAL ACTIVITY

Description	L-Lysine- ¹³ C ₆ hydrochloride is the ¹³ C labeled L-Lysine hydrochloride[1]. L-lysine hydrochloride is an essential amino acid for humans with various benefits including treating herpes, increasing calcium absorption, reducing diabetes-related illnesses and improving gut health[2][3][4].
In Vitro	Stable heavy isotopes of hydrogen, carbon, and other elements have been incorporated into drug molecules, largely as tracers for quantitation during the drug development process. Deuteration has gained attention because of its potential to affect the pharmacokinetic and metabolic profiles of drugs ^[1] . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
