

Penicillinase (from calf stomach)

Cat. No.:	HY-E70077
CAS No.:	9001-74-5
Target:	Endogenous Metabolite
Pathway:	Metabolic Enzyme/Protease
Storage:	Please store the product under the recommended conditions in the Certificate of Analysis.

Penicillinase

BIOLOGICAL ACTIVITY

Description

Penicillinase (from calf stomach) is an enzyme that degrades penicillin by hydrolyzing the cyclic amide bonds in the lactam ring of penicillin, which can inactivate penicillin. Penicillinase (from calf stomach) can be isolated from penicillin resistant strains. Penicillinase (from calf stomach) has potential application as a marker for steroid hormone enzyme linked immunosorbent assay^{[1][2][3]}.
